The revolutionary design of RAYCO's RG1645 combines a 44 hp Kubota turbo-diesel engine, 4 wheel-drive, and 59" cutting width into a compact machine with a low center of gravity. The unique pivot design keeps the engine's weight low to the frame so you don't sacrifice stability to get diesel horsepower to the stump. Fold down chip retainers provide loads of chip capacity and minimize cleanup time.

The RG1645 was built with the operator in mind. RAYCO's exclusive 2-joystick control system makes operation a breeze. One joystick controls ground travel while the other controls cutter boom and backfill blade functions. Command Cut prevents engine stalling and allows maximum horsepower to the cutter wheel. You need a machine that is capable of taking on whatever challenges your job brings. The RG1645 is your smart solution from RAYCO.

**Special Features**

- Dual rear wheels
- Fits through 36" gate (w/removal of outer dual wheels)
